

clear your ears so you can hear

Ideal for children and adults.

The EarPopper is designed to treat people who suffer from ear problems caused by colds, allergies, sinusitis, rhinitis and elevation changes, without medication or ear tube surgery. It is a safe and simple treatment for middle ear pressure problems such as:

- Middle ear fluid (Otitis Media with Effusion)
- Eustachian Tube Dysfunction
- Hearing loss
- Ear pain and pressure caused by airline travel
- Ear fullness caused by colds, allergies, sinusitis

The EarPopper clears the ear naturally with air – it's that easy!

An alternative to drugs and ear tube surgery.

Now you can get instant relief from common ear problems and restore your hearing with the EarPopper. This easy-to-use prescription device is the safe, simple way to get rid of fluid or pressure buildup in your middle ear. Treatment can be performed in your healthcare provider's office with the EP-3000 Professional Version and at home with the EP-2100 Home Version available with a prescription.

Restores hearing in 85% of patients.

^[1] In a four-year study sponsored by the National Institutes of Health, 85% of children diagnosed with hearing loss from persistent Otitis Media with Effusion (OME) who were treated with the EarPopper regained their hearing. The EarPopper restored their hearing to normal without antibiotics or vent tubes.

**Talk with your healthcare provider
to find out if the EarPopper is right for you.**
